

Acrow Props

Brand:
Weight: 0.00kg

Price: \$10.00

Short Description

The remarkably versatile Acrow Prop has many uses and it would be hard to find a building site where it is not used in one way or another. The universal popularity of the Acrow Prop is due to the fact that it provides the simplest and quickest method of temporary support. The main use of the Acrow Prop is in the temporary support of formwork for reinforced concrete floors and beams. They are equally useful as raking shores to support formwork for columns, walls and staircases. Full day: \$10 Weekly: \$20
