Description

The PT70SSPlus HEATER is a quiet alternative to what has been the more traditional Fan Forced Diesel space heaters. The machine has a very gentle and quiet fan. Consequently, the fan operates to disperse the heat on the front face of the unit.

With fuel consumption of only 1.9 l/h, the 15 litre fuel tank gives a run time of approximately 7 hours. In addition, this is now further assisted by a Thermostat control on the heater. As a result, the digital display shows the current ambient air temperature.

Price: \$90 Full day| \$270 Weekly, diesel additional
