

SPECIAL INSTRUCTIONS:

Only those persons who have been trained in the safe use of and who are authorised to do so are to operate a demolition saw.

Sequence	Identified hazards	Key processes to be followed	Precautions / PPE required
1. Pre-start checks	Loose, worn or broken	Inspect all screws, bolts and nuts – retighten if loose and replace if missing.	Do not use faulty equipment.
	parts	Check operation of all controls, including ignition cut off switch.	
	Controls	Check that all guards are fitted and that moving parts are free to move.	Guards must be fitted before use.
	Guards	Inspect blade, and replace if badly worn, or if chipped, cracked or damaged.	Do not use worn or damaged blade.
	Blade		
2. General precautions	Noise	Machine will generate hazardous noise levels during operation.	Operators must wear hearing and eye
	Flying objects	Ensure that guard is fitted correctly to protect from sparks from cutting.	protection, safety footwear and gloves.
	Electrical hazard	Use safety switch when using electrically powered demolition saws.	Keep electrical leads off ground.
		Ensure that lead is kept clear of and not exposed to falling parts or sharp edges.	NO smoking where fuel present.
	Fire	Eliminate all ignition sources when refuelling machine.	
3. Operation	Dust	Concrete and brick dusts may contain silica – wet cut whenever possible.	Wear dust mask if dust is present during
	Over-exertion/strain	Operators should adopt safe work postures and movements.	cutting.
	injury	Always hold saw with both hands when cutting. Keep hands clear of blade.	Use work practices that minimise risk of
	Contact with moving	Do not cut higher than shoulder height; and do use not for inverted cutting.	"kick back".
	blade	Ensure that work area floor is clear of scrap and debris, and that adequate space to	Provide bin for scrap pieces.
		work comfortably is available.	Sweep floor regularly.
	Slips, trips and falls	Keep all other persons clear of cutting area, use warning signs and barricade area to	Prevent unauthorised entry to work
		prevent unauthorised entry.	area.
	Risk to other persons		
4. Cleaning and	Hand injury (cuts and/or	Remove lead from spark plug before commencing work on blade.	Unplug electric powered machines.
maintenance	abrasions)	Use correct (supplied) spanners and tools to undo spindle nut.	Wear leather gloves when handling rough
	Foreign body in eye	Use brush to clean dust and debris from guard, spindle and backing plate.	or sharp parts.
		Ensure spindle thread is undamaged, and that backing plate sits flush.	Wear eye protection.
		Ensure compatibility of replacement blade – correct outer diameter, correct spindle	Ensure all surfaces are clean.
		hole diameter, blade speed matches machine speed.	Do not use incompatible blade.
		Mount parts in correct order, and tighten firmly with the correct tools.	Do not over tighten nut.
